THE KAKAAKO SEWER.

Main Portion Was Completed Last Saturday Night.

Contractor Belser of the firm of Vincent & Belser, which has the contract for the sewer system emptying into the reservoir at Kakaako, states that the main sewer was completed Saturday night, and that the entire system will probably be finished within the next three or four months.

The portion completed Saturday extends from the reservoir at Kakaako to the fish market, thence around to Fort and up to Queen street, and consists of a three-foot concrete line and a 24-inch pipe-line, through which all the sewerage of the system will pass into the Kakaako reservoir and thence into the outfall being constructed by other contractors. Altogether the system nearing completion will have an extent of fifteen miles.

Speaking yesterday of the sewer system, contractor Belser said: "The commission appointed by the Board of Health, and consisting of George Carter, F. B. Edwards and C. B. Ripley, with authority to make suggestions regarding the sanitation of the city, have made some sensible recommendations, which if carried out will make of Honolulu a healthy city. There is nothing like good sanitation, and with it all nuisances menacing the public health can be abated. There should be at least a dozen inspectors, who should be under constant employment, with power to act in abating nuisances detrimental to good health."
